

FAASTeam presents:

Preparing for your Flight Review

Periodic flight reviews are not only required by the FAA, but they are also an important way to maintain competency. Are you due for a flight review soon? Would you like some tips on how to best prepare for it? Join SCFC CFI Nariman Farsaie for a presentation about private pilot flight reviews and how to prepare so that yours goes smoothly. He will discuss both the ground and flight portions, and answer questions about what you will be expected to know and demonstrate.

Recent changes to the Private Pilot PTS draws special attention to some new areas, such as the runway incursion prevention, weather services, aeronautical decision-making and risk management. Although the requirement for a flight review is every 24 calendar months, Flight Center members are encouraged to work toward a tighter standard. Our Developmental Currency program encourages pilots to identify and work on improving at least one knowledge or skill area every 6 months. What topic are you working on? A flight review at San Carlos Flight Center is a great way to build a punch list of future growth areas, so that your flight review is just the start to a long career of continuous improvement. Presenter Nariman Farsaie is a flight instructor with more than 18 years of experience as a pilot, aircraft mechanic, and flight instructor.

Event Details

Wed, Oct 2, 2013 - 7:00 pm

San Carlos Flight Center

655 Skyway Rd

Suite 215

San Carlos, CA 94070
